1. Rock Guide Program

Rock guides specialize in climbing instruction and guiding on technical rock. This includes long, multi-pitch routes; sport climbs on terrain where no glaciation and no permanent or seasonal snow or ice exists.

There are four components to the Rock Guide Program. The first is the Guide Training Rock course, which is followed by the Apprentice Rock Guide exam. (You may wait one year after completing Guide Training Rock before taking the Apprentice Rock Guide Exam.) The third component is a supervised apprenticeship, which qualifies candidates for the final component - the Rock Guide exam. Apprentice Rock Guides have up to 3 years to attend the Rock Guide exam. The Apprentice Rock Guide certification is also a pre-requisite to the Alpine Guide Program.

GUIDE TRAINING ROCK

The goal of Guide Training Rock is to teach the technical rope work systems and techniques used by ACMG Rock Guides. A second goal is to screen candidate movement skills and knowledge of climbing systems. A third goal is to provide direction toward further involvement in the Rock Guide Program and other ACMG certifications.

DURING GUIDE TRAINING ROCK A CANDIDATE IS REQUIRED TO DEMONSTRATE: Personal “flash” climbing standard at a minimum of 5.10d, and minimum “red-point” climbing standard at 5.11a or better, either when placing gear on traditionally protected leads or while climbing bolt protected “sport” climbs. The candidate is current with modern climbing trends and familiar with the language and pedagogy of training for rock climbing. Candidates are expected to arrive with a strong recreational climbing background with an acquired knowledge of knots, belaying, anchors, protection strategies and climbing systems. It is assumed that the candidates can lead the climbs listed on the submitted resume. Candidates are expected to be physically prepared for a week of outdoor activity.

If you have already completed Guide Training Rock and are applying to the Apprentice Rock Guide Exam, complete the Apprentice Rock Guide application package (click on Apprentice Rock Guide on the ACMG web site or call the CMSG Program office for the ARG application package).

2. Notice to Participants of Professional Guide Training Courses - Increased Risk

TRU and the ACMG provide training intended to develop professional skiing, climbing, hiking, rescue, and wilderness travel guides. To train professional guides it is necessary for students to participate in activities that have higher levels of risk than what may be considered reasonable by entry-level, intermediate, novice, commercial guiding, or recreational standards. This may include, but is not limited to activities such as: lead climbing where the climber places his or her own protective equipment, climbing without helmets, travel and decision making in avalanche terrain, climbing and rescue in a multi-pitch environment, students driving program vehicles, hiking in unusually rough and remote terrain, stress from examination and grading processes, students making route and hazard assessment decisions on behalf of other students, unsupervised activities; and continuing with an activity when it may not be considered reasonable by entry-level, intermediate, novice, commercial guiding, or recreational standards (for example, when fatigued, in inclement weather, or in high hazard conditions).

CONCERNING APPLICATIONS

Allow yourself adequate time to create a well-structured, organized, and complete application that arrives on time. Your application is a first impression, as such it plays a significant role in whether you will be accepted into the program or not. Poorly organized applications or unformatted resumes jeopardize your acceptance as your background, skills and qualifications may not be clear and/or may compare unfavourably to other applications. Please retain a copy of your application for your records or in case of loss.

APPLICATION DEADLINE

Applications must be complete and received by the CMSG Program office by the application closing date. Late or incomplete applications may not be accepted.

Application deadlines, course dates and fees can be viewed online at www.cmsg.info or contact the Program Office at (250) 371-5838. Dates and fees are updated regularly and may change without notice. **Applications must be delivered via e-mail. They should be saved in a .pdf package and e-mailed to cmsg@tru.ca. They should only be faxed if you don't have any other options.**

NOTIFICATION OF ACCEPTANCE

Applicants will be notified of acceptance into the course, once accepted the course fee is due and must be paid in full to confirm placement. Please see payment details below.

If accepted and it becomes clear to the instructors that you are not at the standard indicated on your application, instructors have the right to remove you from further participation.

ASSUMPTION OF RISKS – AVALANCHES, ALPINE TERRAIN, SKI TERRAIN, CLIMBING TERRAIN, WILDERNESS TRAVEL, WEATHER, ETC.

I am aware that skiing, climbing, hiking, rescue, wilderness travel, and transportation involves risks, dangers and hazards in addition to those normally associated with travel in land, and air based wilderness environments. Avalanches occur frequently in the alpine terrain used for skiing and climbing and may be caused by but not limited to natural forces or by climbers or skiers. Rock fall, ice fall, climber falls, and skier falls occur frequently in the alpine terrain used for climbing and skiing and may be caused by but not limited to natural forces or by climbers or skiers. Bear or other wildlife attacks, rough or irregular terrain, and hiker falls are frequent hazards in the wilderness terrain used for hiking and may be caused by natural forces or hikers. Vehicle rollovers, overloaded roof racks, pulling trailers, inexperienced drivers, and hazardous driving conditions may occur in the type of transportation used for

Initial

skiing, climbing, hiking, rescue, and wilderness travel and may be caused by but not limited to natural forces or people.

I acknowledge and accept that TRU or the ACMG and their staff may fail to predict whether the terrain used is safe for skiing, climbing, hiking, rescue, wilderness travel, and transportation or whether an accident may occur. The terrain used for skiing, climbing, hiking, rescue, and wilderness travel is uncontrolled, unmarked, not inspected and involves many risks, dangers and hazards. These may include, but are not limited to: attacks by bears and other animals, ice and snow cornices, trees, falling trees, tree wells, tree stumps, creeks, rocks, boulders, forest deadfall, holes and depressions on or below the snow surface, steep slopes, cliffs, ice fall and rock fall, variable and difficult snow conditions, crevasses, snowcat roads and road banks, fences and other man-made structures, impact or collision with other skiers or climbers; hail, lightning, inclement weather, failure to predict weather, vehicle rollovers, overloaded roof racks, pulling trailers, unsafe driving, unsafe road conditions; the failure to ski or climb safely within one's own ability or within designated areas; human error, failure to forecast or recognize a hazardous situation, negligence of other skiers, climbers, hikers, or rescuers; and NEGLIGENCE ON THE PART OF OTHER STUDENTS, TRU, ACMG OR THEIR GUIDES, EMPLOYEES, AND CONTRACTORS INCLUDING THE FAILURE OF TRU OR ACMG OR THEIR GUIDES, EMPLOYEES, AND CONTRACTORS TO SAFEGUARD OR PROTECT ME FROM THE RISKS, DANGERS AND HAZARDS OF WILDERNESS SKIING, CLIMBING, HIKING, RESCUE, WILDERNESS TRAVEL, AND TRANSPORTATION. Communication in the terrain used is difficult and in the event of an accident, rescue and medical treatment may not be available. Weather conditions may be extreme and can change rapidly and without warning, making travel by any means hazardous.

I AM AWARE OF THE RISKS, DANGERS AND HAZARDS ASSOCIATED WITH SKIING, CLIMBING, HIKING, RESCUE, WILDERNESS TRAVEL, AND TRANSPORTATION AND I FREELY ACCEPT AND FULLY ASSUME ALL SUCH RISKS, DANGERS AND HAZARDS AND THE POSSIBILITY OF PERSONAL INJURY, DEATH, PROPERTY DAMAGE OR LOSS RESULTING THERE FROM.

NOTICE TO SNOWBOARDERS AND TELEMAR SKIERS – INCREASED RISK

Unlike alpine ski boot and binding systems, snowboard and some telemark boot and binding systems are not designed or intended to release and will not release under normal circumstances. The use of such systems or the use of a safety strap or retention device by snowboarders or telemark skiers will increase the risk of not surviving an avalanche.

NOTICE TO PARTICIPANTS OF PROFESSIONAL GUIDE TRAINING COURSES – INCREASED RISK

TRU and the ACMG provide training intended to develop professional skiing, climbing, hiking, rescue, and wilderness travel guides. To train professional guides it is necessary for students to participate in activities that have higher levels of risk than what may be considered reasonable by entry-level, intermediate, novice, commercial guiding, or recreational standards. This may include, but is not limited to activities such as: lead climbing where the climber places his or her own protective equipment, climbing without helmets, travel and decision making in avalanche terrain, climbing and rescue in a multi-pitch environment, students driving program vehicles, hiking in unusually rough and remote terrain, stress from examination and grading processes, students making route and hazard assessment decisions on behalf of other students, unsupervised activities; and continuing with an activity when it may not be considered reasonable by entry-level, intermediate, novice, commercial guiding, or recreational standards (for example, when fatigued, in inclement weather, or in high hazard conditions).
