

Most professionals outside of business still require a strong foundation in the principles of management to be effective on the job. Whether it's budgeting know how needed to serve as team leader on a major TV documentary, selling skills required for working as a pharmaceutical company sales rep, or people skills used in selecting the programming staff at a computer graphics firm, the ability to manage effectively is important.

The Bachelor of Science, Bachelor of Computer Studies (BCS) and Bachelor of Arts degrees at TRU have a minor in Management offered by the School of Business and Economics, which provides students the opportunity to acquire these needed skills.

The program is highly flexible, allowing students to fit management classes into their crowded schedules of lectures and labs. Courses taken in mathematics and statistics in the B.A. and B.Sc. can also be used for credit helping to reduce the length of the program.

Go ahead, make the right choice. The Minor in Management could be just what a B.A. (Bachelor of Arts), BCS (Bachelor of Computing Science), or B.Sc. (Bachelor of Science) student needs to be noticed in today's competitive job market.
