

TRU Green Cleaning Product Purchasing Guidelines

(as of November 2014)

TRU Facilities Services has the following 'green'* cleaning product purchasing guidelines:

* 'green' cleaning products are defined as certified by Green Seal or UL Environment (EcoLogo) certified, or under similar multi-criteria sustainability standards for cleaning and janitorial products.

1. TRU Facilities Services will always purchase third-party certified 'green' cleaning products for all of its cleaning needs throughout the campus unless there are extraordinary reasons to do otherwise (such as if there is no 'green' equivalent for a cleaning product).
2. With all cleaning services contracts with outside contractors, TRU Facilities Services will always state in the contract that cleaning services companies must only purchase thirdparty certified 'green' cleaning products for all campus cleaning needs unless there is no 'green' equivalent for a cleaning product, and, in that case, the Associate Director from TRU Facilities Services, or a designate, must sign on the contract that this is allowable.
