

PHILOSOPHY

Philosophy is the study of knowledge, reason, existence, and value. Philosophers carefully consider the nature of the universe, humanity's place in it, the proper conduct of individual and social life, and what we can know.

Studying philosophy involves learning about methods, history, and sub-disciplines: metaphysics, epistemology, and ethics. Additional courses in cutting-edge topics include the philosophy of science, the philosophy of law, the philosophy of sex and love, and more.
