

Course Outline

Department of Economics
School of Business and Economics

ECON 3690-3
Community Economic Development (3,0,0)

Calendar Description

Students investigate methods for effectively using local community resources to enhance economic opportunities while improving social conditions in a sustainable way. Topics include the theoretical basis for community economic development (CED), analytical techniques used to assess communities, environmental sustainability objectives for community development, competing strategies of community development, financing development strategies, and CED activity in Canada and other nations.

Educational Objectives/Outcomes

Upon completing this course, students will be able to:

1. Discuss the economic rationale for community economic development.
2. Describe community economic development and its role in achieving development objectives.
3. Assess the economic health of a community using appropriate analytical techniques.
4. Explain the role of environmental sustainability in community economic development.
5. Describe the function of community economic development in both developed countries and underdeveloped countries.
6. Outline different strategies used in community economic development.

Prerequisites
