

EduRoam setup for Mac 10.4

Open the **Applications** folder in Finder and launch **Internet Connect**. Select the **AirPort** tab.

If the **802.1X** tab is not visible, pull down the **File** menu and select **New 802.1X Connection**.

Select the new **802.1X** tab and enter your username@tru.ca and password
For the **Network Port**, select *AirPort*.

For the **Wireless Network**, enter *EduRoam*.

Click back on the **AirPort** tab. It will ask to save your changes. Enter *EduRoam* and click the **Save** button.

Pull down the **Network** drop-box and select *EduRoam*.

It should now say you are **Status: Authenticating...** at the bottom. A security warning may appear. Click the **Continue** button or the **Show Certificate** button.

Place a checkmark next to Always trust these certificates. Click Continue...

You are now connected to the WPA enabled, EduRoam Secure Network.
