

2016 TRU Learning Award

Haytham El Miligi

Faculty of Science

A passion for learning and a keen interest in asking and answering questions have shaped Dr. Haytham El Miligi's teaching. He believes that the best way to find solutions is through collaboration, which enables multiple ways of learning, a belief rooted in his years of work in industry. This has encouraged Dr. El Miligi to explore new approaches to learning in his classroom, including fostering collaboration among his students and with his colleagues across the disciplines. His focus on interactivity and effective use of technology has enabled his students to design and develop technology applications (apps) that can be used in the real world. He believes that collaboration allows him to expand his own learning and teaching and that of his students, a belief represented in this popular quote he likes to cite: "When you hold a torch to light someone's path, you brighten yours."
