Phone: 250-852-6266

The environmental economics and sustainable development minor provides students with knowledge on current issues in environmental economics, development economics and natural resource management. The program equips students with the knowledge; to deal with contemporary environmental issues, to be able to conduct benefit-cost analysis for project evaluation, to estimate the benefits of environmental preservation, to analyze issues of conservation and resource management in the forestry sector, to examine Canadian and world environmental paths for small communities, as well as to understand the economics of global climate change.
